Trading Update

Trading in the opening quarter of 2010 has been very strong, and significantly ahead of the corresponding period of last year, with both revenues and profit continuing to show substantial progress.

Looking forward, customer demand continues to track ahead of last year, partly as a consequence of an overall improvement in underlying market conditions, and partly due to the benefit of a number of new business wins secured in 2009.

The pipeline of new business opportunities in high growth markets where we are focussing our marketing continues to build momentum, and we are confident of further new business wins in coming months.
