

**STADIUM GROUP PLC**  
**19 JUNE 2007**

**Pre-close Trading Update, and  
Acquisition of Ferrus Power Limited**

Stadium Group Plc, the AIM-listed provider of Electronic Manufacturing Services, will announce interim results for the six months ending 30 June 2007 on Monday 3 September 2007. Commenting on recent trading Chairman Nick Brayshaw said,

*“Sales and margins have continued to show improvement compared with the corresponding period last year, and we remain confident of the outlook for the year.”*

On 15 June 2007, the company completed the acquisition of Ferrus Power Limited (“Ferrus”) for net cash consideration of approximately £670,000.

Ferrus is a specialist designer and manufacturer of custom power converters and power supplies for the medical, industrial, telecommunications and scientific instrument markets from its base at Peterborough, Cambridgeshire. Turnover for the financial year ended 31 October 2006 was approximately £1.3 million.

Ferrus will complement the existing operations of Stadium Power, which designs and manufactures standard, semi-custom and custom power solutions in the UK and Asia.

Stadium Chairman Nick Brayshaw said,

*“I am delighted to announce the further strengthening of our business in the worldwide power solutions market. We previously signalled our intention to invest in this sector with the acquisition of KRP in 2006, which has subsequently traded ahead of our expectations. Ferrus offers additional customers, design and manufacturing capabilities and access to an extensive complementary range of custom products.”*

Ferrus was previously in private ownership, and the vendors will continue to be employed in the business.

**Ends**
